ECR, Neelankarai, Chennai – 600041.**EECP is proven Non-Invasive Technology to stimulate Angiogenesis****Press Release Chennai May 2<sup>nd</sup> 2012. (Vaso-Meditech Pvt Ltd exclusive distributor and clinical support for EECP & SphygmoCor in India)**

In a World Congress of Cardiology Dubai, 18-21 April 2012 EECP got a special attention in a lecture done by eminent Indian American heart surgeon Dr. Mukesh Hariawala based in Harvard Medical School. Presiding over as Chairman of the cardiac surgery session he mentioned Novel cellular therapies in future will make cardiac treatment affordable.

Dr Hariawala optimistically cautioned that there was still a large subset of patients who clinically and diagnostically are unlikely to benefit by CABG (Coronary Artery Bypass Grafting) or Angioplasty/Stent procedures. This is due to the diffused nature of the disease which is often accompanied with diabetes predominantly in the Asian population. They now have the option of proven technologies like the FDA-approved EECP treatment (Enhanced External Counter Pulsation).

EECP Therapy: Non-Invasive therapy for patient with Angina and heart failure. The treatment works by naturally improving the blood supply to the heart muscle by opening the dormant collaterals and by forming new vessel around the blocked artery. Recent evidence shows the treatment also helps to improve the vascular function of the entire vascular system.

Dr.S.Ramasamy Director of Vaso-Meditech commented that the company will further work to expand the indication of EECP therapy in India. The presentation of EECP as a new tool to stimulate angiogenesis will enhance the application of EECP in clinical cardiology.

Dr.Mukesh Hariawala

Dr.Mukesh Hariawala and Dr.Bindu Kansupada with Dr.S.Ramasamy & Dr.Pratiksha.

## About Us:

Vaso-Meditech Pvt Ltd company was incorporated on 2001 is an exclusive distributor for Vasomedical Non-Invasive cardiac treatment Enhanced External Counterpulsation and Atcor Medical Non-Invasive central blood pressure and arterial age assessing device SphygmoCor. Vaso-Meditech has established service and clinical network across India to support the products technically and clinically. The company has supported publication of various research articles in major peer review journal in India and abroad. The Company also provides other noninvasive medical equipment including Holter monitors and 24 Hr ambulatory blood pressure monitors. Additional information is available on the Company's website at [www.vasomeditech.com](http://www.vasomeditech.com), [www.healurheart.com](http://www.healurheart.com)
