Vaso-Meditech Launches EECP/ECP Patient Data Network an Online Portal for Clinical Excellence

Press Release Chennai Dec 9th 2013. (Vaso-Meditech Pvt Ltd, exclusive distributor and clinical support for EECP/ECP in India)

Vaso-Meditech Pvt Ltd launches web based patient data acquiring system to regularize the Indian External Counter Pulsation market. The External Counter Pulsation patient data network (EPDN) will create a largest electronic data infrastructure of patient undergoing External counter pulsation treatment across India. Vaso-Meditech will work with individual hospitals to maintain patient privacy and confidentiality. The online web portal will capture the diverse clinical information of patients and will assist physician and insurance companies to access patient's clinical data and treatment progress online.

Through the web site, Vaso-Meditech clinical division (VCD) will provide the centre with analysis of their patient treatment outcomes; patient selection and patient follow up. The portal will provide the centre with a comprehensive discharge summary based on the pre and post clinical information provided by the center. When VCD is requested it will analyze the centers data and able to provide them patient demographic, patient improvement, improvement sustainability and post procedure follow up information's. This will encourage centers to publish their data and encourage more medical research in to Non-Invasive cardiology field.

The EPDN portal access will be given to Individual centers, Policy makers and insurance company. Insurance company can have access to daily treatment reports of the patients they have given treatment pre authorization and can able to view the patient complete clinical information and get access to the patients discharge summary directly. This will avoid any false claims.

Vaso-Meditech will set up a clinical expert panel to monitor the web site clinical data from treatment centers and can provide require information to insurance companies and policy makers to implement the program to reach cardiac patients across India.
